

G.SHDSL.bis-MODEM

TW-EA802

TW-EA802 SHDSL.bis router is an “all-in-one” unit, combining an SHDSL modem, SHDSL router and Ethernet network switch, providing everything you need to get the machines on your network connected to the Internet over your SHDSL broadband connection. With features such as an SHDSL Quick-Start wizard and DHCP Server, you can be online in no time at all and with a minimum of fuss and configuration, catering for first-time users to the guru requiring advanced features and control over their Internet connection and network.

- Device can work as a Slave or a Master device.

- The SHDSL.bis supports downstream and upstream transmission rates of up to 5.7Mbps on 2-wire and 11.4Mbps on 4-wire.

- Along with the built-in NAT natural firewall feature, the router also provides advanced hacker pattern-filtering protection.

G.SHDSL.bis-MODEM

TW-EA802

Features

- SHDSL Multi-Mode Standard
- Fast Ethernet Switch
- Multi-Protocol to establish a connection
- Quick Installation Wizard
- Universal Plug and Play (UPnP) and UPnP NAT Traversal
- Network Address Translation (NAT)
- SOHO Firewall Security with DoS and SPI
- Domain Name System (DNS) relay
- Dynamic Domain Name System (DDNS)
- Quality of Service (QoS)
- Virtual Server ("port forwarding")
- Rich Packet Filtering
- Dynamic Host Configuration Protocol (DHCP) client and server
- Static and RIP1/2 Routing
- Simple Network Management Protocol (SNMP)
- Web based GUI for configuration and management
- Firmware Upgradeable
- Rich Management Interfaces
